

# KX-TD171

## Extension Card with SLT Caller ID

- 
- The KX-TD171 is an 8 extension expansion card similar to the KX-TD170 but with one added capability.
  - The KX-TD816/1232-3 systems must be equipped with the required KX-TD193 Caller ID cards for the the Caller ID portion of this card to operate
  - The KX-TD171 allows Central Office Caller ID to be regenerated to ONE of two extension ports
  - Either jacks 1 or 2 of the KX-TD171 card can be programmed to send the CID information to a CID compatible SLT device
